

Bakka Sri Santosh Vihar

Artificial Intelligence & Machine Learning

✉ santoshvihar06@gmail.com ☎ 7382146123 📍 Rajahmundry, Andhra Pradesh 🌐 Santosh vihar

🔄 Santosh-vihar

Professional Summary

Motivated AI/ML undergraduate with practical experience in machine learning, predictive modeling, data preprocessing, and Generative AI applications. Skilled in Python, XGBoost, Streamlit, and Hugging Face, with experience developing end-to-end AI solutions. Demonstrates strong analytical thinking, problem-solving, and collaboration skills in delivering data-driven solutions.

Education

Bachelor of Technology in Artificial Intelligence & Machine Learning 09/2024 – Present
Aditya University

Minor in Artificial Intelligence & Data Science 05/2025 – 04/2026
IIT Mandi

Skills

Machine Learning & Deep Learning: Linear Regression, Logistic Regression, Decision Trees, Random Forest, Support Vector Machine (SVM), K-Nearest Neighbors (KNN), Neural Networks, PyTorch, Model Training, Train-Test Splitting, Model Evaluation (MAE, RMSE, R^2)

Data Preparation & Analysis: Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA), Handling Missing Values, Data Visualization

Programming & Libraries: Python, NumPy, Pandas, Scikit-learn, Streamlit, XGBoost, C++, Java (Basic)

AI & NLP Tools: Hugging Face Transformers, Basic RAG, Prompt Engineering, LLM Application Development

Backend & Database: FastAPI, MongoDB

Tools & Workflow: Git, GitHub, n8n, Jupyter Notebook, Google Colab, Version Control

Soft Skills: Problem-Solving, Stakeholder Communication, Critical Thinking, Adaptability, Time Management

Projects

GenAI-Powered Customer Churn Analysis Platform | Python, XGBoost, Streamlit, Hugging Face (LLM)
(Ongoing) 🔗

- Built ChurnIQ, an end-to-end customer retention intelligence platform that enables users to upload customer datasets, identify high-risk customers using XGBoost-based churn prediction, and support proactive retention decisions through an interactive Streamlit dashboard, achieving 74.6% accuracy and 0.824 ROC-AUC.
- Integrated SHAP explainability and Llama-3-powered insight generation to transform churn predictions into interpretable business recommendations and actionable retention strategies for non-technical stakeholders.

Oracle AI – Multi-Agent Intelligent Project Review System | Python, Streamlit, Groq API, Llama Models 🔗

- Developed a multi-agent AI platform that analyzes project ideas and documents to provide pre-development evaluations and recommendations.
- Integrated Groq-hosted Llama models with specialized agents for architecture review, risk assessment, failure prediction, and innovation analysis.
- Built and deployed a Streamlit-based web application with PDF analysis and real-time AI-driven project evaluation.
